
Contents

Transition Metal Catalyzed σ-Bond Activation and Formation Reactions D. G. Musaev · K. Morokuma	1
Theoretical Studies of C-H σ-Bond Activation and Related Reactions by Transition-Metal Complexes S. Sakaki	31
Enantioselectivity in the Dihydroxylation of Alkenes by Osmium Complexes G. Drudis-Solé · G. Ujaque · F. Maseras · A. Lledós	79
Organometallacycles as Intermediates in Oxygen-Transfer Reactions. Reality or Fiction? D. V. Deubel · C. Loschen · G. Frenking	109
Late Transition Metals as Homo- and Co-Polymerization Catalysts A. Michalak · T. Ziegler	145
Co-Oligomerization of 1,3-Butadiene and Ethylene Promoted by Zerovalent 'Bare' Nickel Complexes S. Tobisch	187
The Cluster Approach for the Adsorption of Small Molecules on Oxide Surfaces V. Staemmler	219
Author Index Volume 1-14	257
Subject Index	263
