

David Allan Bromley

(1926 - 2005)

Ph.D. Rochester 1952 ⁴

Dissertation: Ground state parities of nitrogen-14 and carbon-14. ⁴

Advisors: Harry Wilks Fulbright ^{3,4}

Student: Richard Francis Xavier Casten ^{1,2}

Notes:

¹ Casten, R. F. X. Collective nuclear structure studies in the osmium nuclei. Ph.D. Thesis, Yale University, 1967.

“It is a great pleasure to acknowledge my appreciation to Dr. J. S. Greenberg and to Prof. D. A. Bromley who supervised the research performed here.”

² Email communication with RFX Casten (10 Sep 2001).

³ Email communication with DA Bromley (21 Sep 2001)

⁴ Bromley, D.A. Ground state parities of nitrogen-14 and carbon-14. Ph.D. Dissertation, University of Rochester, Rochester, NY, 1952. (“I wish to express my indebtedness to Professor H.W. Fulbright for suggesting the problem and for his continued encouragement and advice.”)
